

angle coupling

item number	H	thickness of metal sheet
NSUK 50	46	1,0
NSUK 100	96	1,0

product description: Angle couplings are mostly used at places where the route is slightly bended, for large bending radiuses or for the circumvention of columns and pillars.

The advantage of an angle coupling is that it makes it easy to create a break in a tray of almost any angle.

To fix the connection use the bolt NSM 6X10. To protect the cables, the bolt head is inside the cable tray.

Coupling and bolt with a GMT surface finish is used for a tray with an F surface finish.

The coupling may be supplied in polyester varnish (varnish layer 60, 100 μm).

configuration: S - Pre-Galvanized, zinc-layer 15 - 27 μm
 GMT - non electrolytic plating, aluminum-zinc-layer 5-15 μm
 (equivalent Hot Dip Galvanized)
 EC - epoxy coating for indoor environment, - total paint, 60 μm

sales amount: á 1 pc

certification: EN 61537:02

storage: EN 60721-3-1
